

Packard HVAC Questions Received as of 8/17/2015
Addendum #2

1. The as-built drawing provided shows the existing 4 ton unit over open office spaces. Will any work in this area need to be done during off hours or is the space unoccupied? Please confirm.

Per the Facilities Manager and Director: Any crane work or moving and setting of heavy equipment *requires* evacuation of the space underneath. Ductwork in a ceiling over an occupied area may request someone to move from underneath due to dust or noise, but is not required.

2. Can you provide additional information on the requirements for certified payroll and DIR registration?

As for DIR requirements, you must make this interpretation yourself as the responsible contractor.

This is what the SB854 DIR requirements state (information can be found at <http://www.dir.ca.gov/public-works/SB854.html>)

As of March 1, 2015 no contractor or subcontractor may be listed on a bid proposal for a public works project unless registered with DIR.

As of April 1, 2015 for all new projects awarded on or after this date, the contractors and subcontractors must furnish electronic certified payroll records to the Labor Commissioner.
