

**COMPREHENSIVE COMMUNITY HEALTH ASSESSMENT AND
COMMUNITY HEALTH IMPROVEMENT PLAN CONSULTANT – MAPP PROJECT**

**Questions Received as of 5/19/16
Addendum #2**

- Q: I am writing to clarify how to best provide you relevant information related to #7 Financial Information (Page 10) of the Yuba County HHSD CHA/CHIP-MAPP RFP. I bring over 15 years' experience conducting related assessments and preparing planning documents, but recently moved from another consulting firm to Raimi + Associates. For that reason, I am not be able to access contracts, but would be able to provide you related information. Could you please let me know the purpose of question #7 Financial Information, and what information (other than the contract itself) we could provide you so that you are able to accurately evaluate our proposal.
- A: The purpose of requesting financial statements is to ensure the entity that is awarded the contract has a history demonstrating financial sustainability in conducting similar services. This is an important component of making an equitable decision by verifying the awarded contractor demonstrates sound business practices that will provide conditions to be successful seeing through the completion of the proposed project. If you are seeking to bid on the contract through the firm you are currently employed by, it is only necessary to provide financial statements that demonstrate the financial sustainability for that entity and will not require further documentation as it relates to the employees' past consulting with other firms. If you intend to bid independently, please provide any information and/or documentation that will serve to demonstrate financial sustainability of similar services previously conducted.
