- d. Do not reduce, thin, or dilute coatings or add materials to coatings unless such procedure is specifically described in manufacturer's product instructions.

 - 1. Preparation as specified by manufacturer.
 - 2. Two top coats shall be applied unless otherwise indicated.

- b. Verify that surfaces are ready to receive paint as instructed by the product manufacturer.
- c. Examine surfaces scheduled to be finished prior to commencement of work. Report any condition that may potentially affect proper application.

- b. Prepare surfaces using the methods recommended by the manufacturer for achieving the best result for the substrate under the project conditions.

However, all surface contamination such as oil, grease, loose paint, mill scale, dirt, foreign matter, rust, mold, mildew, mortar, efflorescence, and sealers must be removed to assure sound bonding to the tightly adhering old paint. Glossy surfaces of old paint films must be clean and dull before repainting. Thorough washing with an abrasive cleanser will clean and dull in one operation, or, wash thoroughly and dull by sanding. Spot prime any bare areas with an appropriate primer.
 - Recognize that any surface preparation short of total removal of the old coating may compromise the service length of the system. Check for compatibility by applying a test patch of the recommended coating system, covering at least 2 to 3 square feet. Allow to dry one week before testing adhesion per ASTM D3359. If the coating system is incompatible, complete removal may be required.
- h. Exterior walls: Must be clean and free of any loose material. The pH of the surface should be between 6 and 9, unless the products to be used are designed to be used in high pH environments such as Loxon.
- i. High- and Ultra-High Pressure Water Jetting for Steel and Other Hard Materials SSPC-SP12 or NACE 5: This standard provides requirements for the use of high- and ultra-high pressure water jetting to achieve various degrees of surface cleanliness. This standard is limited in scope to the use of water only, without the addition of solid particles in the stream. For complete instructions, refer to Joint Surface Preparation Standard (SSPC-SP12/NACE No.5)

O. APPLICATION

- a. Apply products in accordance with manufacturer's instructions.
- b. Do not apply finishes to surfaces that are not dry. Allow applied coats to dry before next coat is applied.
